

# INDUSTRIAL & CANNATRUE™ SRS DIY MAINTENANCE KITS

## KEEP YOUR SYSTEM RUNNING EFFICIENTLY

Frequent preventative maintenance promotes proper performance and reduces risk of equipment downtime, saving your organization money in the long run.

With straight-forward instructions included, our DIY Preventative Maintenance Kits are designed to be easy to use, even for those with no experience.

## OPERATION AND MAINTENANCE GUIDELINES

We recommend an oil change after every 1,000 hours of usage or once a year in a low-volume processing environment.

A system flush is recommended after every 2,000 hours of usage or every other oil change.

Both packages come with phone support if you would like CBG Biotech's expert assistance.
