

SolvTrue™

PMP2012A Solvent Transfer Pump Cart

Designed for laboratory and industrial solvent handling workflows that support solvent recycling, parts cleaning, and effective solvent transfer in manufacturing and maintenance operations.

The SolvTrue™ PMP2012A is a cart-mounted solvent transfer pump designed to complement SolvTrue™ S700, S700C and S700V solvent recyclers, supporting safe, effective solvent transfer in environments where reducing manual handling and improving workflow consistency are priorities.

Engineered to Support Solvent Handling

System features support safe operation, reliable performance and efficient on-site solvent handling.

Key Features

- Cart-mounted solvent transfer pump designed for controlled solvent movement
- Supports simple and safe solvent handling when used with compatible solvent recyclers; locking casters
- Reduces manual solvent transfer and associated spill risks
- Designed to complement S700, S700C and S700V solvent recyclers
- Suitable for laboratory and industrial solvent handling workflows

Standard Equipment

- Solvent transfer pump assembly
- Mobile cart with integrated frame, locking casters
- Standard inlet and outlet connections
- Electrical components configured for safe operation and ease of use, thumb switch, motor fuse protected, ground straps

Ancillary Supplies

- Transfer hoses compatible with solvent type and application are available
- Drum adapters and fittings as required are available
- Additional containment or connection accessories available based on site configuration

Specifications

- Construction suitable for solvent handling applications
- Electrical configuration based on system requirements

PMP2012A Solvent Transfer Pump Cart

Technical Specifications

System Type	Cart-mounted solvent transfer pump accessory
Intended Use	Supports safe, effective transfer of solvents between containers and compatible solvent recyclers
Construction	Rugged corrosion resistant bronze pump, powder coated frame, 4 GMP, viton seals
Mounting and Mobility	Cart-mounted design for portable operation Locking casters for stability during use
Electrical Configuration	120V Standard (NEMA 5-15), 220V available special order
Ancillary Connections and Accessories	Standard inlet and outlet connections, 1/2" ID tubing Drum adapters and fittings available based on solvent type and application
Safety Considerations*	Designed to reduce manual solvent handling Cannot operate and walkaway, locking casters Supports safer and time saving solvent transfer practices in laboratory and industrial workflows, fused motor, continuously hold toggle thumb switch to operate
Compatible Systems	SolvTrue™ S700 – 7-gallon simple distillation recycler for Alcohols and common industrial solvents SolvTrue™ S700C – 7-gallon simple distillation recycler with vacuum assist for low-boiling-point and engineered solvents, including fluorinated solvents SolvTrue™ S700V – 7-gallon simple distillation recycler with vacuum assist designed for higher-boiling-point industrial solvents

*Proper grounding required when transferring flammable solvents. Always use included strainer. Do not dry run pump to prevent pump damage. Do not use with acidic or other corrosive chemicals.

Cost-Saving Benefits and Advantages

Our industrial solvent recycling solutions are designed to help lower your facility's solvent spend, reduce solvent waste and disposal costs, support effective management of EPA hazardous Waste Generator Status, adhere to relevant industry regulations, and maintain certifications while positively impacting the environment.

Adopt sustainability

Reduce hazardous waste

Improve operational efficiency

Save up to 95% annually on solvent purchase and disposal costs
